

Name : Ankith M Kashyap

Day04 - Assignment

Explain String methods():

lower() : this method converts the given string into a lower cased sentence/character !!

ex:

```
>>> string input: Hey , hello Let's upgrade !!
```

```
>>> output: hey , hello let's upgrade !!
```

upper(): this method converts the given string into a upper cased sentence/character !!

ex:

```
>>> string input: What are you learning on Let's Upgrade ?
```

```
>>> output: WHAT ARE YOU LEARNING ON LET'S UPGRADE ?
```
